

## THE RADIANT ENGAGE ROOM MANAGER

- Allows users to book rooms with Corporate RFID badges
- Identifies room issues and notifies maintenance/facilities
- Works with ITSM systems and submits service tickets for room issues
- Clears and alerts users of room abandonment
- Utilizes multiple light indicators to show upcoming room availability
- Integrates with Radiant Pulse for reporting room use and occupancy

## ACTIVELY ENGAGE WITH YOUR ROOM SCHEDULING PANELS

Room booking. Occupancy sensors. Colored light indicators. Calendar synchronization. These are standard features associated with room scheduling panels. But what if your scheduling panel could do more?

The Radiant Engage Room Manager can do more. More than just a room scheduler, the Radiant Engage Room Manager streamlines scheduling, support and signage into one sleek device that integrates seamlessly into your collaboration ecosystem. Our panel offers the expected booking, sensors, indicators and calendar synchronization; however, the Radiant Engage Room Manager expands on these basic features and incorporates additional functionality. The result is a room scheduling device designed to increase efficiency, productivity and ROI.

Our scheduling panel also integrates with your digital signage platform to broadcast corporate communications, news and weather. Want to locate a specific room or find building amenities? The Radiant Engage panel can utilize interactive wayfinding to help navigate guests through the facility. The panel can also be used to broadcast emergency building notifications and display evacuation plans.
