

Project Spotlight: Digital Transformation & Data Integration Initiative

Lead Consultant: LeighAnn Guagenti
Radiant Technology

The Challenge: Aligning Systems and Teams

Organizations undergoing digital transformation often face challenges that go beyond technology. Disconnected systems, lack of data visibility, and misalignment between teams can slow progress and limit impact.

The Execution

To address these challenges, LeighAnn led a structured and collaborative approach focused on aligning people, processes, and technology:

- **Stakeholder Alignment:** Worked closely with leadership and teams to ensure shared goals and clear direction.
- **Process Evaluation:** Identified gaps in workflows and opportunities for improvement.
- **Change Management Support:** Guided teams through adoption to ensure long-term success.
- **Phased Implementation:** Delivered solutions in stages to reduce disruption and improve outcomes.

The Result

The transformation significantly improved operational efficiency and visibility across the organization. With integrated systems and clearer data insights, teams were able to make faster, more informed decisions. Workflows became more streamlined, reducing manual effort and improving overall productivity.

The Strategy

Led by **LeighAnn Guagenti**, Radiant implemented a people-first, data-driven approach to support transformation and improve operational visibility.

- **Data Integration:** Connected previously disconnected systems to create a unified view of operations.
- **Improved Visibility:** Enabled real-time access to critical data for better decision-making.
- **Workflow Optimization:** Streamlined processes to improve efficiency and reduce manual effort.
- **User Adoption Focus:** Ensured solutions were intuitive and aligned with how teams work daily.
